

Prince Jairo Fortuna

Software Developer

A problem solver with passion for crafting innovative solutions. Equipped with a strong foundation and diverse skill set in web development and an open-minded individual who actively listens to others to gain valuable perspectives he can't identify by himself. Ever excited to continue pushing boundaries in various domains and expanding limitation by upskilling with regenerative persistence, and will always be willing to take the extra steps when needed.

"Discover the thing that fulfills you and let that thing kill you."

WORK EXPERIENCE

Software Developer

Aug 2022 - Aug 2023

In1go Technologies Inc.

A progressive logistics software development company and project management firm, leveraging technology to drive innovation and optimize efficiency.

- Assigned to handle multiple projects with diverse business flows.
- Maintained, enhanced, and optimized a logistics web application.
- Implemented additional improvements and maintained an HRIS web application.
- In charge of and exposed to scalable API endpoints for mobile and web projects.
- Optimized databases queries to improve application performance.
- Regularly resolved past and current issues and efficiently addressed challenges for clients.
- Gained valuable exposure to logistics operations and became well-versed in the intricate details of the business flow.
- Developed solutions for clients' regular requests, ensuring customer satisfaction as the assigned software developer of the said systems.
- Added enhancements to fleet-view monitoring features for tracking, tracing, and real-time monitoring of vehicle activities and shipment statuses, ensuring efficient and timely delivery of shipments.
- Maintained the reports system with detailed data and charts to provide comprehensive insights for better decision-making and easy export of thousands of related report data.
